

NEW Processing Unit 40D12

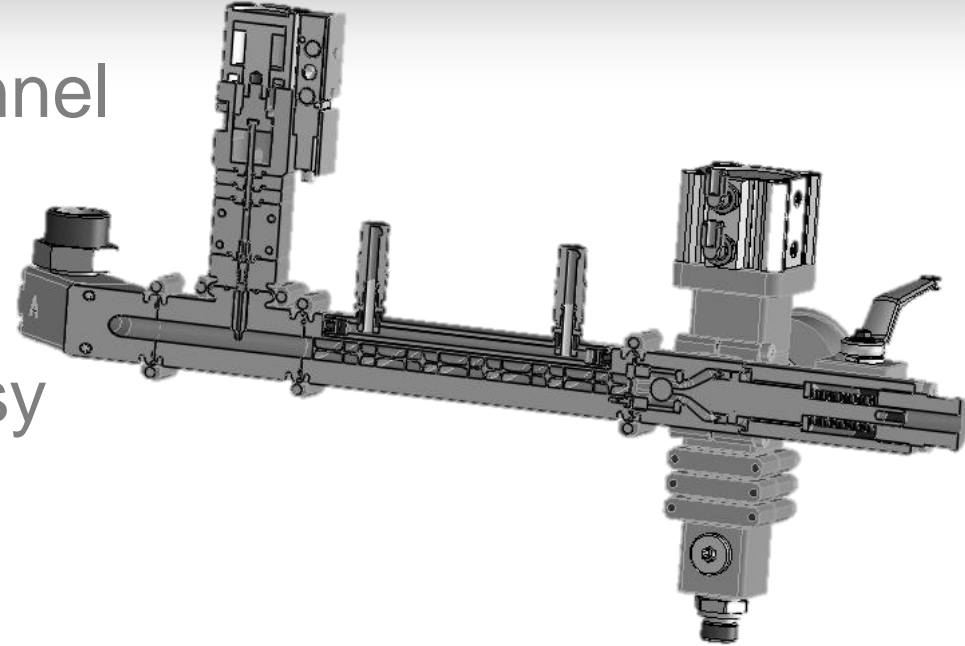

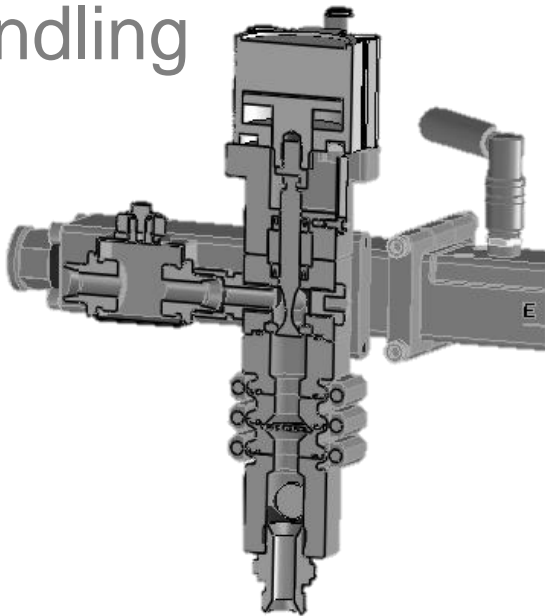

NEW Processing Unit 40D12

- Complete new design
- Flexible Setup
- Optimized material flow
- 50% weight reduced
- 30% less maintenance and cleaning

New designed material channels

- Consistent material channel diameter
- Quick connection for easy handling

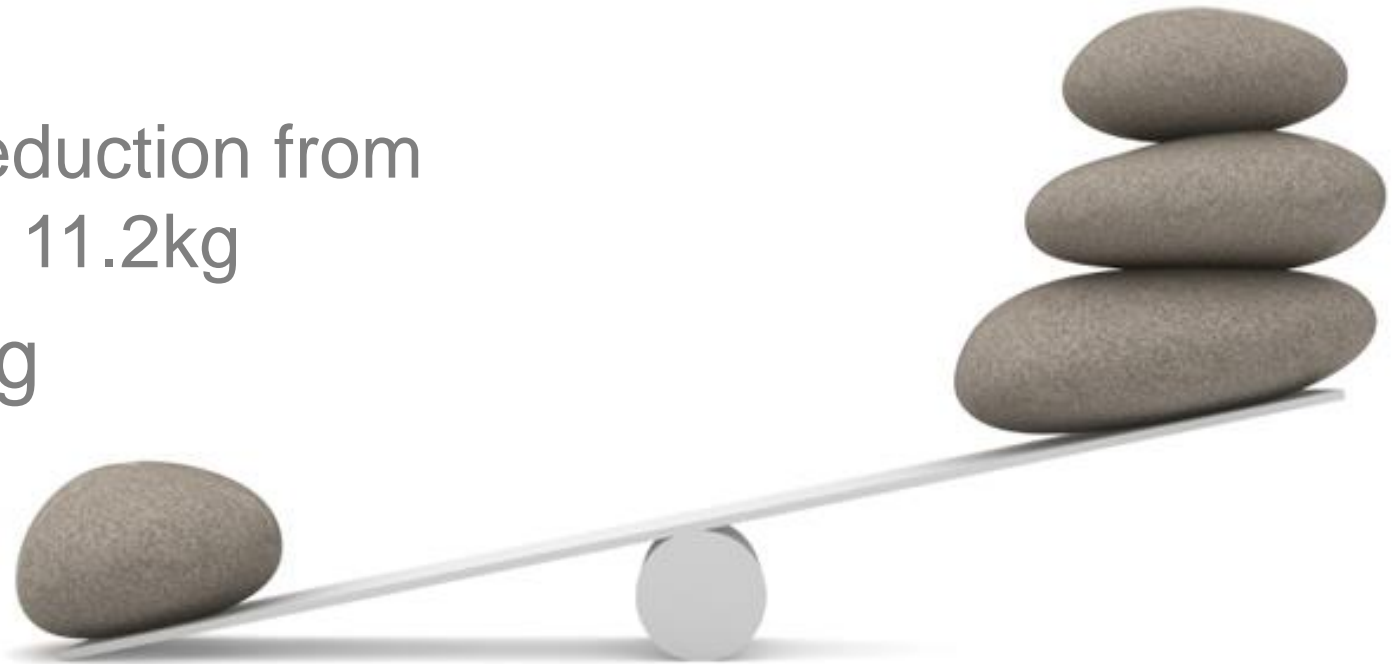

- No dead angle which guarantees no cured material inside

Weight reduction

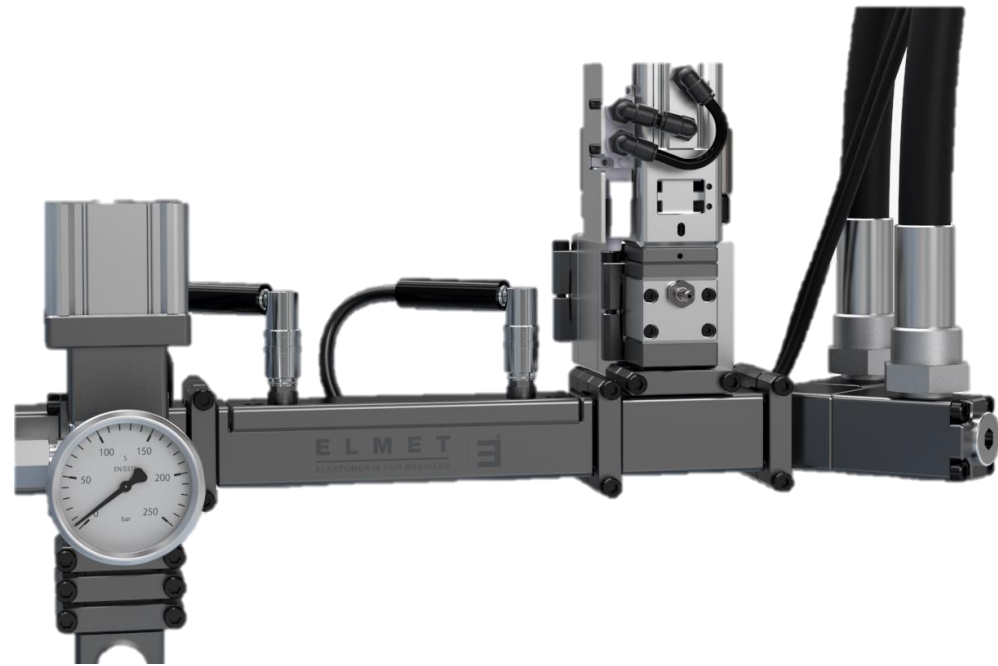

- All components out of anodized aluminum
=> Medical industry
- Weight reduction from 25.5kg to 11.2kg
- 14.3Kg

Reinigungszeiten reduziert

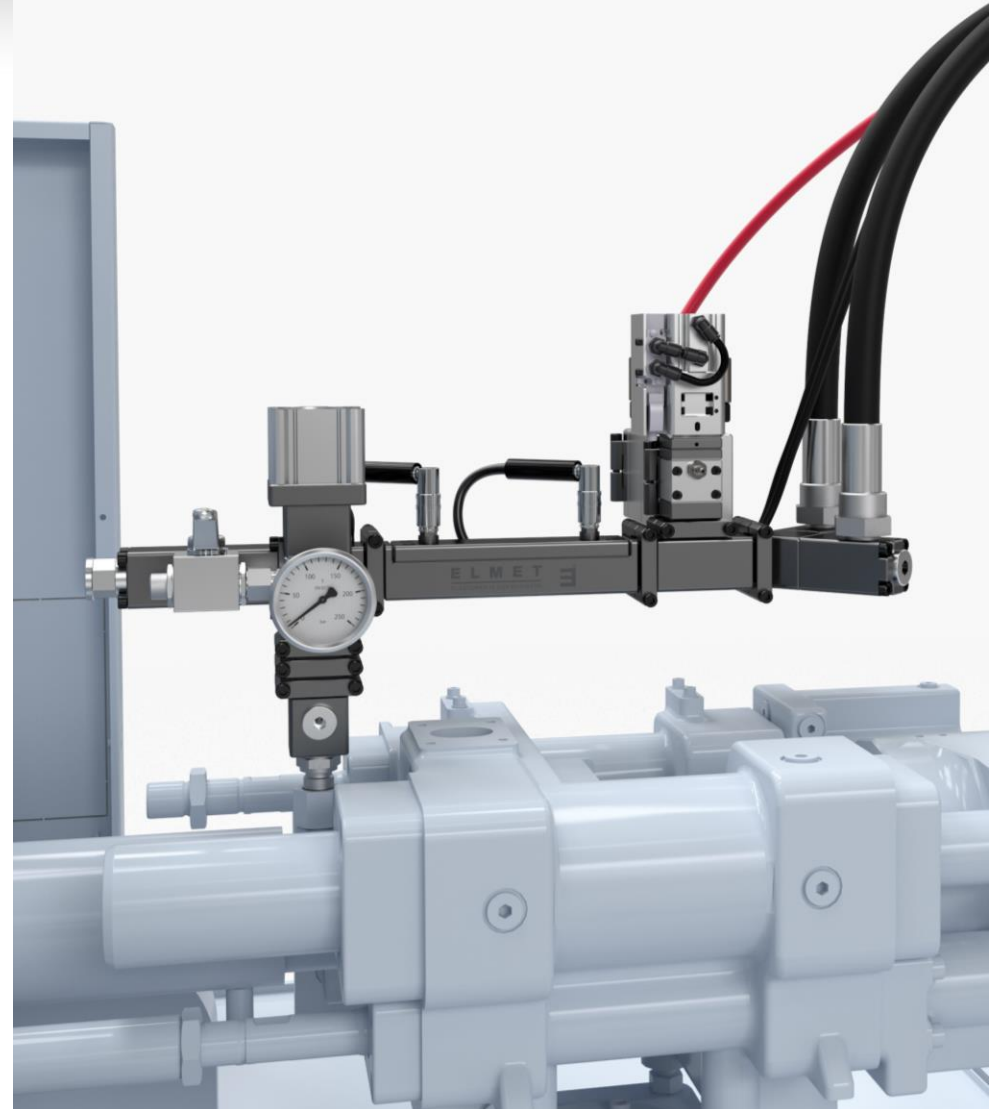

- Fast maintenance through new clamping system – quick connection
- Modular system – Set up according to customers needs
- Mixing block can be completely disassembled – easy cleaning

What's new?

- Shut-off valve closes against the flow direction of the material which assist the non return valve at closing
- Cooling jacket integrated at static mixer
- Material pressure limiter adjusted by a 24 open end wrench
- No sharp edges inside => radius
- Quick connections
